1. Guide

Clause	Heading	Comments
		The B2B Procedures are critical to participants for building their systems and developing business processes. A substantial amount of information has now been extracted from the Procedures and placed in the B2B Guide. This Guide is not subject to Consultation under the IEC and therefore, as with previous Guidelines developed to assist participants with NEM processes, there is a risk this document will not be updated to keep pace with B2B updates as required by changes to the NER, NERR and jurisdictional changes. There are two alternatives; retrofit the content of the B2B Guide into the Procedures so they fall within the Consultation framework or include the B2B Guide in the Procedures so it comes under the Consultation process. The addition of the B2B Guide results in an additional document that must be consulted in order to understand the B2B processes and determine business/system impacts. There is little or no reference in the Procedures to clauses in the B2B Guide making cross referencing difficult. It is suggest the information in the B2B Guide be retrofitted to the Procedures.
