### A. Proposed Changes to the Meter Churn Package

| Item | Description | Category | Participant Comments |
|---|---|---|---|
| 1 | **PROPOSED/ REQUESTED CHANGES** | | |
| 1.1 | **Effective Date: 1 September, 2015** | **Procedure only** | Origin does not support an effective application date of 31 December 2014 to align the NER and the Metrology Procedures with respect to meter churn. This view is supported by the following:<br><br>• The short period to implement the changes from an IT perspective. Origin is currently undertaking significant system change process for large customers which is expected to complete in the 3rd quarter of 2015<br><br>• The time required for retailers to assess the impact the change will have on commitments provided to customers and strategic partners; |

| Item | Description | Category | Participant Comments |
|---|---|---|---|
| | | | • A large number of customers renew their contracts or change retailers at this time of the year. As such, application of the procedure at this time will result in negative customer outcomes, impact upon their agreed contractual terms (e.g. tariff structures and other services) and may result in a large number of exceptions in the commercial and industrial electricity market unnecessarily;<br><br>For these reasons, Origin suggests that at the very least, AEMO and the Industry propose a new effective date of implementation as suggested by the ERAA of 30th September. |
| 1.2 | SLP – MDP:<br>Section. 8 Meter Churn Management<br>Update scenarios to include MDFF application | **Procedure only** | Update scenarios to include MDFF application in the commentary and diagrams. There are inconsistencies and different interpretations amongst MDPs with what is expected to be provided in the MDFF in terms of meter serial number and readings on the day of meter Churn. |
