Dear David,

Re: Submission to include the Pecan Lighting 30w LED Retro-Fit Kit to suit Westside Flinders luminaires in the National Electricity Market Load Tables for Unmetered Connection Points.

We request that approval be given for the inclusion of the Pecan Lighting 30w LED Retro-fit kit to the NEM Load Table @ 30w.

The following documentation is presented in support of our submission;

1. Letter of Market support from Mt Barker Council.
2. Test Reports; 50115449 001 – Power Consumption measurement at rated voltage along with the Test Log for additional data. The item in question is number 3 in the “Description of the test item” section but number 2 in the power consumption results page.

We thank you for your consideration in including these Pecan Lighting 30w LED Retro-fit kits on the NEM Load tables.

Yours sincerely,

Terry Cook – General Manager
