

The following table provides the information on the operation of the Swing Service market on the North Metro and South Metro sub-networks over a 13 month rolling window.

Month	Metro-South Sub-Network		Metro-North Sub-Network	
	Peak SS South-Metro	Average SS South-Metro	Peak SS North-Metro	Average SS North-Metro
April 2022	82	16	340	31
May 2022	11	5	661	52
June 2022	352	20	354	39
July 2022	1,413	113	37	4
August 2022	12	8	104	37
September 2022	11	9	200	20
October 2022	7,001	242	5,490	298
November 2022	329	17	160	9
December 2022	683	59	169	12
January 2023	1,495	143	1,712	92
February 2023	1,220	100	386	82
March 2023	724	58	1,497	167
April 2023	1,039	97	3,452	997
Average	2-year	67	2-year	54

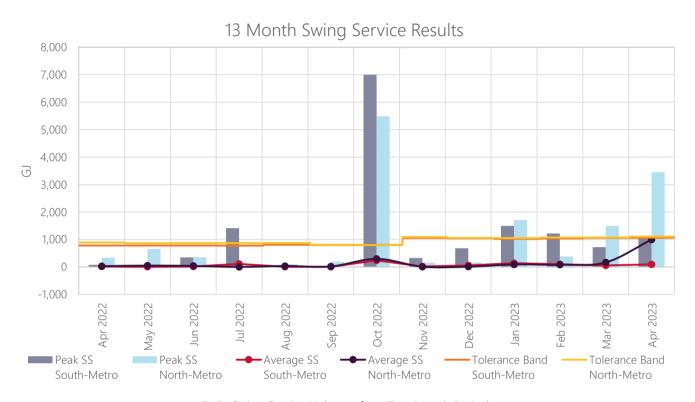

North Metro

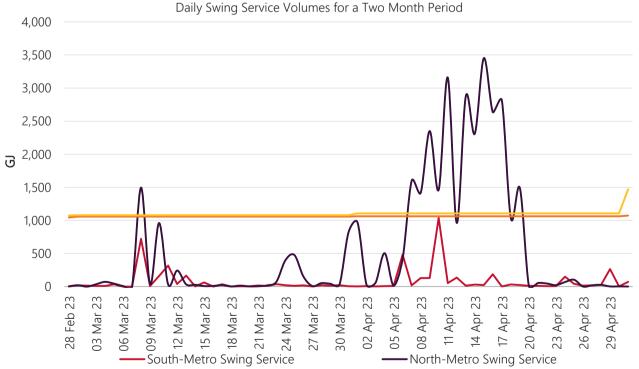

Average and peak swing service volumes in the North Metro sub-network were at higher levels than usual for the month of April 2023, with spikes on gas days 1, 7 - 19 April. The high swing service volume on gas day 1 April was investigated and found to be due to a metering error. The high swing service volumes on gas days 7 - 19 April were due to pipeline injection being less than the user pipeline nominated amount (UPNA). APA experienced ongoing higher pressure affecting their ability to inject gas into the sub-network on these gas days.

South Metro

Average and peak swing service volumes in the South Metro sub-network were at relatively low levels for the month of April 2023, with the exception of a spike on gas day 10 April. The high swing service volumes on gas day 10 April was due to pipeline injection being less than the user pipeline nominated amount (UPNA).

WA Monthly Swing Service Market Outcomes April-2023

Terms:

- Peak SS means the maximum amount of Swing Service recorded on a day during that month.
- Average SS means the average amount of Swing Service for any day in that month.
- Peak Trend is the linear trend of the Peak SS data, using the least squares method.
- Average Trend is the linear trend of the Average SS data, using the least squares method.
- Tolerance Band is a marker AEMO will investigate and report on any Swing Service spikes that are larger than the Tolerance Band. The Tolerance Band is defined as a volume equal to the mean amount of Swing Service over the last 2 years plus 3 standard deviations.
