##### **Retail Market Procedures (WA) 178, 181 and 197 and clause 10.3 of Interface Control Document by Perth Energy on gas day 15/09/2016.**

Description	See the description above.
Action taken	Perth Energy has acknowledged that the zero nomination is a not a valid "quantity" nomination as per ICD. Perth Energy traders were notified of the incident and advised to follow the standard gas trading procedure and refer to the ICD before submitting nominations.
Impact	<p>Perth Energy's actions have contributed to the Swing Service spike of 1.2TJ on 1107 for gas day 15/09/2016.</p> <p>No submissions were received from participants in response to the request for submissions. Therefore, AEMO determines that the breach of clauses 178, 181 and 197 of the Procedures and clause 10.3 of the ICD by Perth Energy on gas day 15/09/2016 was not material.</p>
