Re: Submission to amend the NEM Load Table (Unmetered Loads) for the Artcraft Genesis.

David,

At the request of the City of Salisbury, we would like to have the following LED luminaires added to the listing for the Artcraft Genesis 18 & 25 luminaires in the current National Electricity Market Load Tables.

These luminaires are electrically identical to the corresponding Genesis luminaire as shown in the table below.

| Luminaire | Total system power | External label | Electrically identical to: |
|-----------------|--------------------|----------------|----------------------------|
| Metro 18 LED | 19.4W | L19 | Genesis 18 LED |
| Metro 25 LED | 25.7W | L26 | Genesis 25 LED |
| Flinders 25 LED | 25.7W | L26 | Genesis 25 LED |

The luminaires are designed and manufactured in accordance with SA/SZS TS 1158.6, and are internally and externally labelled according to that standard.

The system wattage is exclusive of the optional photocell, which is supplied by others.

This application is supported by the following documentation:

- Letter of support from the City of Salisbury
- Brochures for Metro 18, Metro 25 and Flinders 25 luminaires

Kind regards,

Kevin Godfrey

Technical Manager
