

Intent to Deregister Kincora Production Facility from Gas Bulletin Board

The Australian Energy Market Operator (AEMO), as the Bulletin Board (BB) Operator is hereby providing notice that it intends to deregister the Kincora Production Facility from the Gas Bulletin Board, effective 6 December 2013.

Deregistration is based on the following information provided by Origin Energy Resources Limited ('Origin'), operator of the Kincora Production Facility.

- The facility has ceased operation as a production facility
- There is no capacity to operate the facility as an independent storage facility

Based on this information, AEMO considers that the Kincora Production Facility has ceased to be a BB facility. In accordance with subrule 154(2)(a) of the National Gas Rules, AEMO proposes to remove the facility from the BB facilities list with effect from 6 December.

On deregistration, Kincora will no longer be displayed on the Bulletin Board and will not be required to provide any operational data. All historical data will however remain and will include Kincora up until the day prior to the effective date.

If in future the operational status of the facility changes so that it again becomes a BB facility (for example, if production recommences or the facility is used as a storage facility), the operator of the facility must apply to AEMO for registration under Part 18 of the National Gas Rules before that change occurs.

Bulletin Board Operator.
