

## National Gas Market BULLETIN BOARD

### Exemption of BB Production Facility – Silver Springs.

The Bulletin Board Operator (BBO) under the National Gas Rules (the Rules) exempted AGL Upstream (MOS) Pty Ltd, the Operator of the Silver Springs BB Production Facility, from providing daily data (3-day capacity outlook and actual production data) to the BBO in relation to the facility, effective 23 June 2011. This exemption is subject to the following conditions as set out in rule 164:

1. The Operator must provide the nameplate rating of this facility in writing to the BBO by June 30<sup>th</sup> each year; and
2. The Operator must notify the BBO in writing as soon as practicable if there is a change to the nameplate rating which may impact the facility for more than one year.

The reason for the making of the exemption is that the nameplate rating of the facility is less than 20TJ of Natural gas per day and accordingly the Facility met the criteria in subrule 151(7)(b) of the Rules.

Bulletin Board Operator.

NOTE: This is the sole BB Production Facility in the Roma production zone operated by AGL Upstream (MOS) Pty Ltd and as it has an aggregated capacity of less than 20TJ of natural gas per gas day, rule 151(5) does not apply.
