

Hello Nathan

Stanwell's feedback on this matter is as follows:

We support the outcome of this procedure change, that is, increased transparency of gas pipeline flow within the Wallumbilla zone. The change is likely to have little implementation cost for Stanwell. We are concerned with the manner in which the procedure change has been initiated by COAG specifically as a "short cut" and "quick fix". It also appears that the change is being implemented regardless of the draft conclusions from AEMC's East Coast Wholesale Gas Market and Pipeline Frameworks Review. While Stanwell supports the desired outcome, we are disappointed by this further demonstration of a lack of coordination between COAG, AEMO and the AEMC.

Please let me know if you have any questions.

Regards

Jen
