

Additional disbursements charge for new NEM registration

Disbursements charge effective for invoices issued from: 10 October 2018 to 30 June 2019

Application Type	2018-19 \$
Disbursements charge - Registration as Semi-Scheduled Market Generators	5,000
Disbursements charge - Registration as Non-Scheduled Market Generator	2,500

These disbursement charges covers AEMO's 'incremental cost' for each new applicant in the expedited model set up for energy operational forecasting. The forecasting model is required under the National Electricity Rule 3.7B(c) for the purposes outlined in Rule 3.7B(a). This charge is in addition to the NEM registrations fee schedule for 2018/19.
