

REVIEW OF POWER SYSTEM RECLASSIFICATION EVENTS

1 NOVEMBER 2015 TO 30 APRIL 2016

FOR THE NATIONAL ELECTRICITY MARKET

Published: September 2016

IMPORTANT NOTICE

Purpose

AEMO has prepared this document to review power system reclassification events in the National Electricity Market for the period 1 November 2015 to 30 April 2016.

Disclaimer

This document or the information in it may be subsequently updated or amended. This document does not constitute legal or business advice, and should not be relied on as a substitute for obtaining detailed advice about the National Electricity Law, the National Electricity Rules, or any other applicable laws, procedures or policies. AEMO has made every effort to ensure the quality of the information in this document but cannot guarantee its accuracy or completeness.

Accordingly, to the maximum extent permitted by law, AEMO and its officers, employees and consultants involved in the preparation of this document:

- make no representation or warranty, express or implied, as to the currency, accuracy, reliability or completeness of the information in this document; and
- are not liable (whether by reason of negligence or otherwise) for any statements or representations in this document, or any omissions from it, or for any use or reliance on the information in it.

1. INTRODUCTION

This report sets out AEMO's reasons for all decisions to re-classify *non-credible contingency events* to *credible contingency events* under clause 4.2.3A(i) of the National Electricity Rules (NER).

AEMO is required to issue such a report every six months. This report covers the period from 1 November 2015 to 30 April 2016 (**reporting period**). The report:

1. Includes an explanation of how AEMO applied the criteria established in accordance with clause 4.2.3B for each of these decisions.
2. Includes AEMO's analysis of reclassification trends during the relevant period and its appraisal of the appropriateness and effectiveness of the relevant criteria applied in the case of each reclassification decision.

In this document, a word or phrase in *this style* has the same meaning as given to that term in the NER.

2. OVERVIEW

Apart from one event, AEMO appropriately reclassified *non-credible contingency events* as credible *contingency events* based on the reclassification criteria contained in AEMO's Power System Security Guidelines SO_OP_3715¹ for bushfires, lightning or other reasons. AEMO notified *Market Participants*, via *Market Notices*², of the reasons for reclassifying these *non-credible contingency events*.

The number of reclassification events in this reporting period has increased compared with historical summer trends. AEMO will commence a review into the reclassification criteria to determine if the current methodologies are still appropriate. This review will involve consultation with industry stakeholders and will be completed in 2017.

¹ AEMO Power System Security Guidelines. Power system operating procedures are available at: <http://aemo.com.au/Electricity/National-Electricity-Market-NEM/Security-and-reliability/Power-system-operation>.

² A Market Notice is an email notification issued in real time by AEMO to market participants. Market Notices are also published on AEMO's website at: <https://www.aemo.com.au/Electricity/National-Electricity-Market-NEM/Market-notices-and-events>.

3. AEMO'S ROLE

The *power system* is operated such that it will remain in a *satisfactory operating state*³ for the loss of single elements in the *transmission network*. These events are defined as *credible contingency events*⁴ and include:

- Unexpected loss of a single transmission line, transformer or reactive plant.
- Unexpected loss of a single generating unit.

AEMO considers the occurrence of these events to be reasonably possible and will ensure contingency plans are in place to minimise impact on the *power system* following a *credible contingency event*.

A *non-credible contingency event* is a *contingency event* other than a *credible contingency event*.

Examples include:

- Three phase electrical faults.
- The trip of any busbar in the *transmission network*.
- The trip of more than one *transmission element*.
- The trip of *transmission plant* in a manner not considered likely (e.g. a *transmission line* that trips at one end only).
- The trip of multiple *generating units*.
- The trip of more than one *load block* in a *region* where the combined *load* lost exceeds what would normally be considered a *credible contingency event* in that *region*.

AEMO does not normally operate the *power system* such that it will remain in a *satisfactory operating state* following a *non-credible contingency event*, as the likelihood of this occurrence is low.

AEMO may reclassify a *non-credible contingency event* as a *credible contingency event* if the risk of this event impacting the *power system* is increased due to *abnormal conditions*. *Abnormal conditions* may include severe weather conditions, lightning and bushfires.⁵

4. RECLASSIFICATION CRITERIA

AEMO has developed criteria for determining if a *non-credible contingency event* should be reclassified as a *credible contingency event (reclassification criteria)*. The reclassification criteria are specified in AEMO's Power System Security Guidelines SO_OP_3715. The reclassification criteria apply to:

- Bushfires.
- Lightning.
- Other events (pollution, protection and control issues, advice from participants).

AEMO recently reviewed the reclassification criteria for bushfires and lightning. For the bushfire reclassification criteria there was no change.

The lightning reclassification criteria were modified, by removing pairs of *transmission lines* from the 'Vulnerable Transmission Lines' list⁶ after three years (where it was five years) if those lines had not tripped again due to lightning in the three years since the initial trip.

The following section analyses how AEMO reclassified *non-credible contingency events* using the reclassification criteria for the reporting period.

³ Refer to clause 4.2.2 of the NER.

⁴ Refer to clause 4.2.3 of the NER.

⁵ See clause 4.2.3A(a) of the NER.

⁶ See Table 5 in Section 11.4.2 of SO_OP_3715 Power System Security Guidelines.

5. RECLASSIFICATION EVENTS

1 NOVEMBER 2015 TO 30 APRIL 2016

AEMO reclassified 616 events during the reporting period. Table 1 summarises these events. Refer to Appendix A for a complete list of events. Each relevant contingency did not occur.

Table 1 Reclassification events for period 1 November 2015 to 30 April 2016

Criteria	Number of Reclassification Events	Incidence of contingency occurring during reclassification
Bushfires	6	0
Lightning	594	0
Other	16	0
Total for Period	616	0

AEMO correctly reclassified events due to bushfires using the criteria specified in Section 11.3 of SO_OP3715. There were six reclassifications due to bushfires in this period.

AEMO correctly reclassified events due to lightning using the criteria specified in Section 11.4 of SO_OP3715. There were 594 reclassifications due to lightning in this reporting period, but none of these occurred.

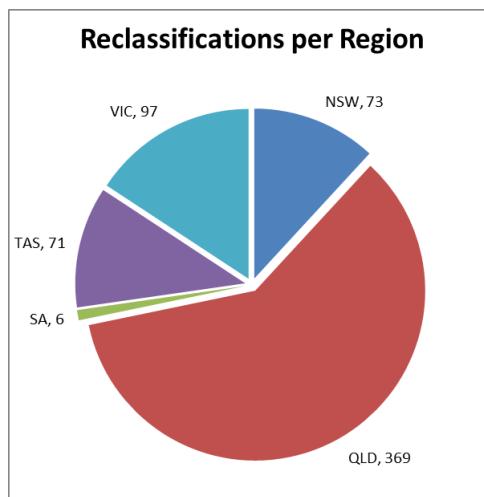

During the reporting period, there were 16 reclassifications for other reasons using the reclassification criteria specified in Section 11.5 and 11.6 of SO_OP_3715. These events were reclassified due to abnormal weather conditions, advice from participants, or that the non-credible contingencies had occurred and AEMO considered there was a risk of reoccurrence.

AEMO incorrectly reclassified one event. On 2 December 2015, both Roma – Coolumboola 7164 and 7174 132 kV lines tripped. AEMO reclassified this as a *credible contingency event* based on advice from Powerlink that the cause was unknown. AEMO cancelled the reclassification eight hours later, because it did not meet the reclassification criteria as lines 7164 and 7174 lines are not classified as *transmission elements*.

5.1 Reclassification trends

Figure 1 shows the number of reclassification events per region for the reporting period.

Figure 1 Reclassifications per region 1 November 2015 to 30 April 2016

The historical trend of reclassification events is shown in Figure 2. The number of reclassification events has increased during this reporting period, compared to the previous summer, due to increased lightning reclassifications.

Three sets of adjacent *transmission lines* tripped due to lightning before being reclassified by AEMO. These lines were not on the Vulnerable Transmission Line list⁷ and, consequently, are not normally reclassified in the presence of lightning. As a result of these lines tripping, AEMO subsequently added them to the lightning Vulnerable Transmission Line list (see Table 2) because they fulfilled the criteria specified in section 11.4.1 of SO_OP_3715. There have been 55 reclassification events on these *transmission lines* since they were added to the Vulnerable Transmission Line list. During these 55 reclassifications, there were no contingency events.

Figure 2 Historical reclassification events

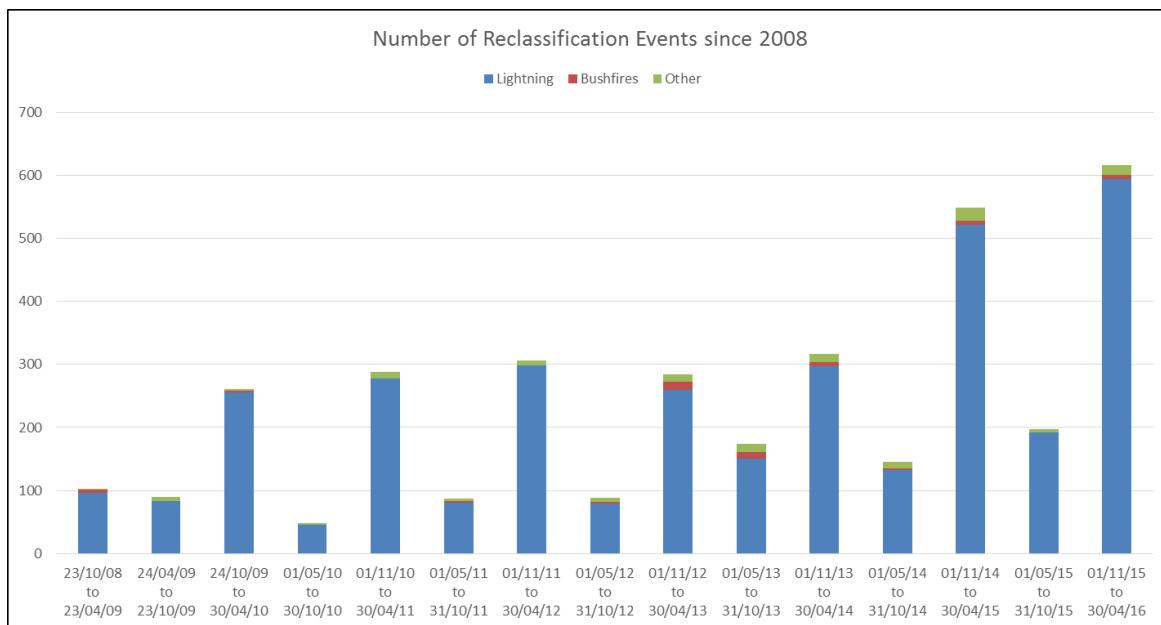

Table 2 Transmission lines added to the lightning vulnerable transmission line list

Transmission line added to the lightning vulnerable transmission line list	Region	Reclassification Events	Contingencies during reclassification
Chinchilla – Columboola 7349 and 7350 132 kV lines	QLD	38	0
Collinsville – Stoney Creek 7306 and Collinsville – Newlands 7121 132 kV lines	QLD	8	0
Bouldercombe – Rockhampton 7108 and Bouldercombe – Egans Hill 7221 132 kV lines	QLD	9	0
Total for period		55	0

6. NON-CREDIBLE CONTINGENCY EVENTS 1 NOVEMBER 2015 TO 30 APRIL 2016

There were 30 *non-credible contingency events* during the reporting period. AEMO subsequently reclassified 14 of these as *credible contingency events* as there was a risk of the event reoccurring.

⁷ See section 11.4.2 of SO_OP_3715.

Appendix B lists all *non-credible contingency events* during the reporting period, and AEMO's assessment in determining whether to reclassify each event as credible. The rows highlighted blue in Appendix B explain the reclassification events corresponding to the reclassifications highlighted blue in Appendix A.

7. EVENTS RECLASSIFIED IN PREVIOUS REPORTING PERIOD

Table 3 shows one *non-credible contingency event* that was reclassified as a *credible contingency event*. AEMO cancelled this reclassification because AEMO's assessment showed no increased risk of the *non-credible contingency event*'s occurring.

Table 3 Events reclassified in previous reporting period but cancelled in this reporting period

Start MN	Start reclassification	End reclassification	Reclassified equipment	Region	Reason
46661	19/10/2014 23:30	18/01/2016 07:00	Trip of Ballarat – Elaine – Moorabool 220 kV line and Waubra WF	VIC	Other

8. MARKET IMPACT OF RECLASSIFICATION CONSTRAINTS

When AEMO reclassifies an event as a *credible contingency event*, the *power system* must be operated so it stays in a *satisfactory operating state* should the *credible contingency event* occur. One way to ensure this happens is to invoke constraint equations to manage the *power system* while an event is reclassified.

Appendix C lists the binding constraint equations during reclassification events over the reporting period.

There were 14 reclassified events that resulted in binding constraint equations.

9. CONCLUSION

AEMO concluded that, during the reporting period:

1. Apart from one event, AEMO correctly applied the reclassification criteria.
2. AEMO notified *Market Participants* of the reasons for reclassifying *non-credible contingency events*.
3. The number of reclassification events has increased compared with historical summer trends.

APPENDIX A. RECLASSIFICATION EVENTS 1 NOVEMBER 2015 TO 30 APRIL 2016

Please note the below definitions:

GPATS – The Global Positioning and Tracking System (GPATS) is used to provide detection and location of cloud to ground lightning strikes. GPATS delivers 'live' data with a refresh rate of 1 second and provides full coverage of the transmission system.

INDJI – Indji Watch (INDJI) is a system that monitors live information feeds on hazards such as bushfires and displays their positions relative to the locations of transmission assets.

APPENDIX B. NON-CREDIBLE CONTINGENCY EVENTS 1 NOVEMBER 2015 TO 30 APRIL 2016

Table 5 Non-credible contingency events 1 November 2015 to 30 April 2016

Date of contingency	Description	Region	Reason	Was the contingency then reclassified?	Comments
01/11/2015 22:11	Trip of Heywood – South East No.1 275 kV line	SA	Other	Yes	ElectraNet advised that the trip was due to incompatible protection relay setting. AEMO reclassified the event as the cause remained unknown. AEMO cancelled the reclassification on 5/11/2015 when the cause was identified and resolved.
02/11/2015 12:42	Trip of Barron Gorge Power Station – Kamerunga 132 kV lines 7143 and 7184	QLD	Other	No	Barron Gorge Power Station advised that the trip was caused by failure of local supply changeover during the planned maintenance. AEMO did not reclassify the event as the cause was identified and resolved.
03/11/2015 14:27	Trip of three Tomago Potlines	NSW	Other	Yes	TransGrid advised that the trip was caused by a defective power supply rectifier at Tomago. AEMO reclassified the event as the cause was not known. AEMO cancelled the reclassification on the same day after cause was identified and resolved.
04/11/2015 12:32	Trip of 132 kV bus at Uranquinty	NSW	Other	No	TransGrid advised that the trip was due to a human error. AEMO did not reclassify the event because the cause was identified. AEMO considered the event was unlikely to reoccur.
04/11/2015 17:17	Trip of North West Bend – Berri – Monash No. 2 132 kV, and North West Bend Transformer No. 2	SA	Other	Yes	ElectraNet advised that the trip of the transformer was caused by protection operation due to loose terminals. AEMO reclassified the event as the cause was unknown. AEMO cancelled the reclassification on 07/12/2016 when the cause was identified and resolved.
12/11/2015 09:28	Trip of Horsham – Red Cliffs 220 kV line and run back of Murraylink. Following this CB WT_Q1 at the Murraylink Red Cliffs opened.	VIC	Other	Yes	APA Group advised the circuit breaker tripped due to the loss of auxiliary power supplies. AEMO reclassified this event because the cause was not known. AEMO cancelled the reclassification on 15/08/2016 when the cause was identified and resolved.
20/11/2015 13:08	Trip of Wallerawang – Ingleburn 77 330 kV and Ingleburn – Sydney South 78 330 kV line	NSW	Other	No	TransGrid advised that the trip was caused by a failure of a CT associated with a circuit breaker at Ingleburn substation. AEMO did not reclassify the event because the cause was identified. AEMO considered the event was unlikely to reoccur.

Date of contingency	Description	Region	Reason	Was the contingency then reclassified?	Comments
20/11/2015 20:43	Trip of Baralaba – Blackwater 7113 132 kV line at Baralaba end	QLD	Other	No	Powerlink advised the trip was due to faulty protection relay operation. AEMO did not reclassify the event because the cause was identified and resolved.
25/11/2015 09:51	Trip of Clare North – Mintaro and Waterloo – Waterloo East 132 kV lines	SA	Other	Yes	ElectraNet advised the trip of Waterloo – Waterloo East 132 kV line was caused by faulty protection operation. The trip of Clare North – Mintaro 132 kV line was due to bushfires. AEMO reclassified the event as the cause was unknown and considered the event was likely to reoccur. AEMO cancelled the reclassification on 23/12/2015 when the protection was rectified.
01/12/2015 13:47	Trip Lismore 132 kV CB's 9W12, 9U92 and 9U82	NSW	Other	No	TransGrid advised the trip was due to incorrect isolation during planned maintenance. AEMO did not reclassify the event as the cause was identified and corrective actions were taken to ensure the event would not reoccur.
02/12/2015 01:25	Trip of Roma – Coolumboola 7164 and 7174 132 kV lines	QLD	Other	Yes	AEMO reclassified this event as the cause was unknown based on advice from Powerlink. AEMO cancelled the reclassification 8 hours later as this event does not fulfil the criteria specified in SO_OP_3715. See section 5.
06/12/2015 23:08	Trip of Yallourn No. 2 220 kV bus, and two generating units at Yallourn Power Station	VIC	Other	No	Energy Australia advised that the trip was due to incorrect operation of a generator circuit breaker at Yallourn Power Station, resulting in tripping of the bus. AEMO did not reclassify the event because the cause was identified and considered unlikely to reoccur.
16/12/2015 14:13	Trip of Murraylink – Berri 132 kV CB 6077 at Murraylink end	SA	Other	No	ElectraNet advised the trip was caused by a faulty control card. AEMO did not reclassify the event because the cause was identify and considered unlikely to reoccur.
22/12/2015 16:18	Trip of Chalumbin Woree 876 275 kV line at Woree end	QLD	Other	No	Powerlink advised the trip was due to faulty protection relay operation. AEMO did not reclassify the event because the cause was identified and resolved.
05/01/2016 13:43	Trip of Bulli Creek – Millmerran 9904 330 kV line at Bulli Creek end	QLD	Other	No	Powerlink advised the trip was due to human error during planned work. AEMO did not reclassify the event because the cause was identified and considered unlikely to reoccur.
08/01/2016 19:30	Trip of Chapel Street – Liapootah – Repulse 220 kV line at Chapel Street end	TAS	Other	Yes	TasNetworks advised the trip was caused by incorrect protection operation. AEMO reclassified the event as the cause was unknown. On the same day, AEMO cancelled the reclassification after the cause was identified and resolved.
13/01/2016 12:58	Trip of Woolooga 3 transformer 132 kV CB 4432 at 132 kV end	QLD	Other	No	Powerlink advised the trip was caused by incorrect protection operation. AEMO did not reclassify the event because the cause was identified and resolved.

Date of contingency	Description	Region	Reason	Was the contingency then reclassified?	Comments
24/01/2016 00:51	Trip of Bell Bay Three Unit 2 and 3	TAS	Other	Yes	Hydro Tasmania advised that the trip was due to incorrect control setting. AEMO reclassified the event as the cause was unknown and considered the event was likely to reoccur. AEMO cancelled the reclassification on 04/04/2016 when the cause was identified and resolved.
29/01/2016 01:27	Trip of Barron Gorge – Kamerunga 7143 and 7184 132 kV lines	QLD	Other	Yes	Stanwell advised the trip was due to the generator transformer's protection operation. AEMO reclassified this event because the cause was unknown. AEMO cancelled the reclassification on 22/07/2016 when the cause was identified and considered the event was unlikely to reoccur.
30/01/2016 03:01	Trip of Hummocks – Waterloo 132 kV line at Waterloo end	SA	Other	Yes	ElectraNet advised the trip was caused by incorrect protection operation. AEMO reclassified the event because the cause was unknown. AEMO cancelled the reclassification when the cause was identified and resolved on 12/02/2016.
03/02/2016 20:31	Trip of Bouldercombe – Rockhampton 7108 and Bouldercombe – Egans Hill 7221 132 kV lines	QLD	Lightning	No	Powerlink advised the trip was caused by lightning in the area. AEMO did not reclassify the event because lightning activities were no longer observed in the area. AEMO updated SO_OP3715 to include these lines in the vulnerable list.
05/02/2016 18:11	Trip of Collinsville – Stoney Creek 7306 and Collinsville – Newlands 7121 132 kV lines	QLD	Lightning	Yes	Powerlink advised the trip and auto reclosed of the lines was caused by lightning in the area. AEMO reclassified the event because lightning activities were still observed in the area. AEMO updated SO_OP3715 to include these lines in the vulnerable list.
09/02/2016 14:23	Trip of Gordon – Chapel Street No. 2 and Liapootah – Catagunya Tee Wayatinah 220 kV lines	TAS	Lightning and Other	Yes	TasNetworks advised the trip of Gordon – Chapel Street No. 2 was likely due to lightning. Hydro Tasmania advised that the trip of Liapootah – Catagunya Tee Wayatinah was due to incorrect protection operation. AEMO reclassified the event as the cause was unknown and considered the event was likely to reoccur. AEMO cancelled the reclassification on 17/02/2016 when the cause was identified and resolved.
15/03/2016 15:52	Trip of Condabri Central No. 1 132 kV bus	QLD	Other	No	Powerlink advised the trip was caused by human error. AEMO did not reclassify this event as the cause was identified and the event was unlikely to reoccur.
22/03/2016 20:50	Trip of Jeeralang No. 2 220 kV bus	VIC	Other	No	AusNet advised that the trip was caused by a faulty component on the Jeeralang Power Station unit transformer. AEMO did not reclassify this event because the cause was identified and the problem resolved.

Date of contingency	Description	Region	Reason	Was the contingency then reclassified?	Comments
23/03/2016 10:52	Trip of Blackstone substation H72 CB's 88262, 88872, 5422 and 5412	QLD	Other	No	Powerlink advised the trip was caused by human error. AEMO did not reclassify this event as the cause was identified and considered the event was unlikely to reoccur.
07/04/2016 10:09	Trip of B2 generator circuit breaker and Jeeralang No. 1 220 kV bus	VIC	Other	No	Ecogen advised that the trip was due to B2 generator circuit breaker failing to open during shutdown of B2 generator, resulting in tripping of the bus. AEMO did not reclassify the event as advised by Ecogen that the cause was identified and resolved.
10/04/2016 20:59	Trip of B2 generator circuit breaker and Jeeralang No. 1 220 kV bus	VIC	Other	Yes	Ecogen advised that the trip was due to B2 generator circuit breaker failing to open during shutdown of B2 generator, resulting in tripping of the bus. AEMO did not reclassify this event as the circuit breaker was isolated for further investigation. AEMO later reclassified this event when the generator circuit breaker was returned to service on 14/04/2016. AEMO considered the event was likely to reoccur as the cause had not been rectified. AEMO cancelled the reclassification on 03/06/2016 when the cause was resolved.
23/04/2016 20:31	Trip of SESS No. 1 275 kV SVC and No. 2 275 kV SVC	SA	Other	Yes	ElectraNet advised the trip was caused by failure of the 415V auxiliary supply to the SVCs. AEMO reclassified the event as the cause had not been identified. AEMO cancelled the reclassification on 23/06/2016 when the cause was identified and resolved.
28/04/2016 14:44	Trip of Rowville A1 500/220 kV transformer and No. 1 SVC	VIC	Other	No	AusNet advised that the trip was caused by human error. AEMO did not reclassify this event as the cause was identified and considered the event was unlikely to reoccur.

APPENDIX C. MARKET IMPACT OF RECLASSIFICATION CONSTRAINTS 1 NOVEMBER 2015 TO 30 APRIL 2016

Table 6 Reclassification constraints that bound over the reporting period

Reclassification Start time	Reclassification End time	Reclassified Equipment	Constraint	Number of Dispatch Intervals binding
01/11/2015 13:50	01/11/2015 18:00	Rowville Yallourn No. 5 and No. 6 220 kV lines	V>V_NIL_ROYP56_R5_1	13
06/11/2015 21:30	06/11/2015 22:15	Liapootah – Palmerston No. 1 and No. 2 220 kV lines	T>T_NIL_LIPM_N-2_2B	5
25/11/2015 23:05	25/11/2015 23:40	Liapootah – Palmerston No. 1 and No. 2 220 kV lines	T>T_NIL_LIPM_N-2_2B	7
08/12/2015 07:05	08/12/2015 10:15	Farrell Reece No. 1 and No. 2 220 kV lines	F_T+FARE_N-2_TG_R6_1	11
			F_T+FARE_N-2_RREG	2
			F_T+FARE_N-2_TG_R60	4
15/12/2015 14:20	15/12/2015 17:55	Liapootah – Palmerston No. 1 and No. 2 220 kV lines	T>T_NIL_LIPM_N-2_2B	18
15/12/2015 18:15	15/12/2015 19:35	Farrell – Sheffield No. 1 and No. 2 220 kV lines	F_T+FASH_N-2_TG_R6_1	15
			F_T+FASH_N-2_TG_R5	8
			F_T+FASH_N-2_TG_R60	9
20/12/2015 12:25	20/12/2015 15:40	Rowville Yallourn No. 5 and No. 6 220 kV lines	V>V_NIL_ROYP56_R2_3	15
			V>V_NIL_ROYP56_R2_1	10
13/01/2016 16:40	13/01/2016 18:05	Farrell Reece No. 1 and No. 2 220 kV lines	F_T+FARE_N-2_TG_R6_1	17
			F_T+FARE_N-2_RREG	14
13/01/2016 19:25	13/01/2016 21:35	Farrell – Sheffield No. 1 and No. 2 220 kV lines	T>T_FASH_1_N-2	2
			F_T+FASH_N-2_RREG	16
			F_T+FASH_N-2_TG_R60	1
13/01/2016 18:25	13/01/2016 19:05	Liapootah – Palmerston No. 1 and No. 2 220 kV lines	T>T_NIL_LIPM_N-2_2A	2
29/01/2016 13:40	29/01/2016 19:30	Farrell – Sheffield No. 1 and No. 2 220 kV lines	F_T+FASH_N-2_RREG	65
			F_T+FASH_N-2_TG_R60	16
23/02/2016 16:15	23/02/2016 16:55	Rowville Yallourn No. 5 and No. 6 220 kV lines	V>V_NIL_ROYP56_R2_1	8
09/03/2016 00:40	09/03/2016 02:15	Liapootah – Palmerston No. 1 and No. 2 220 kV lines	T>T_NIL_LIPM_N-2_2A	15

Reclassification Start time	Reclassification End time	Reclassified Equipment	Constraint	Number of Dispatch Intervals binding
09/03/2016 03:25	09/03/2016 04:20	Liapootah – Palmerston No. 1 and No. 2 220 kV lines	T>T_NIL_LIPM_N-2_2A	7
