Dear David,

**Re: Submission to include the LRL NXT-12C 525mA Luminaire in the National Electricity Market Load Tables for Unmetered Connection Points.**

We request that approval be given for the inclusion of the LRL NXT-12C 525mA LED to the NEM Load Table. Requested wattage is 22w.

The following documentation is presented in support of our submission;

1. Letter of Market support from the City of Charles Sturt.
2. Specification Sheets and Performance Specifications.
3. Test Reports; LLI-20336 – Power Consumption measurement at rated voltage.

The tests were done without PE Cell as we have no control over which model PE Cell the client chooses to utilise. We thank you for your consideration in including the NXT-12C luminaire on the NEM Load tables.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'Terry Cook', is written over a light blue horizontal line.

Terry Cook – General Manager
