**Re: Submission to include iGuzzini Street EH77 & Twilight E026 to the National Electricity Market Load Table**

Dear Mr. Ripper,

iGuzzini Partner Illuminotecnica request to have the following luminaires included in the National Electricity Market Load Table for Unmetered Loads.

- iGuzzini Street EH77 - System Watts 23.45w
- iGuzzini Twilight E026 - System Watts 20.18w
- Tested with LED modules and LED driver only, excluding any other control device such as a PE Cell. Luminaire will be controlled via a remote mounted PE Cell connected to unmetered load supply.
- TS 1158.6 compliant markings:  
Luminaire is of a type whereby aesthetic considerations are a function of the usage factor. A Label with the required information will be provided with the luminaire for location by others (section 1.6). This will be in addition to the required internal labels and necessary installation instructions.
- Supporting documentation previously submitted:
  - City of Gold Coast Council supporting letters, requesting the inclusion of the luminaire to be listed on the NEM load table
  - Nata Test Report 200104LCP
  - Nata Test Report 200105LCP
  - Luminaire Data Sheets

We would appreciate your assistance for the inclusion onto the AEMO Load Table.

Should you have any queries, please do not hesitate to contact Robert Woodward directly on 0409 445 690.

Kind Regards,

p.p.  
Mr. Rino Brindisi  
Director
