FAO Christian Mildner

Dear Christian,

Subject: Use of Cimcon Cellular Smart Lighting Controllers (SLCs) on unmetered loads within the Energy Queensland operational region

The Department of Transport and Main Roads Queensland (DTMR) intends to deploy a smart lighting controls system using the Cimcon SLC devices. The system will provide monitoring and controls capabilities for DTMR's lighting assets to improve asset management and enable reductions in energy usage and greenhouse gas emissions.

To enable these initiatives to benefit DTMR it will be necessary to include the SLCs in the NEM Load Tables as new type 7 unmetered devices.

Therefore, DTMR supports your submission to AEMO to include the Cimcon SLCs in the NEM Load Tables.

Please advise when they have been published.

Yours sincerely,

Noel Peters
Director (ITS Technologies)
