To whom it may concern

Re: Candela Toorak 12LED 14W Luminaire

The City of Whittlesea is preparing a bulk changeover of between 1,100 – 1,500 80W MV decorative streetlights with suitable LED replacements.

Given its commitment to sustainable, energy efficient street lighting, the City of Whittlesea supports Vicpole's initiative to seek approval of the 12LED 14W Toorak top entry luminaire.

The significant reduction in power consumption, from 80W to 14W, will support Council's drive to replace inefficient street lights with energy efficient street lighting and will substantially reduce electricity consumption and greenhouse gas emissions, helping the City of Whittlesea to achieve its zero net emissions target by 2022.

Should you wish to discuss this matter further, please do not hesitate to contact the undersigned.
