

Notice to all BB interested parties,

8 December 2011

Notice to BB interested parties on AEMO decision to amend the timing of the production of the INT 924 Actual Flows 7 Days

This notice advises BB interested parties that AEMO has decided to amend the times at which the data report INT924 is published on the BB from every 6 hours to every 4 hours (first report remains 6.30 am AEST).

AEMO has received a number of requests from stakeholders requesting AEMO to amend the timing of this report so actual flow data that is often available early morning is available in a more timely fashion. Currently BB users have to wait until the report gets refreshed at 12.30 pm to see this information. AEMO will now run the report every 4 hours (starting at 6.30 am) enabling early morning actual flow data to be captured in a 10.30 am report.

Any comments on this notice should be sent to bbo@aemo.com.au.
