

The following table provides the information on the operation of the Swing Service market on the North Metro and South Metro sub-networks over a 13 month rolling window.

| Month          | Metro-South Sub-Network |             | Metro-North Sub-Network |             |
|----------------|-------------------------|-------------|-------------------------|-------------|
|                | Peak SS                 | Average SS  | Peak SS                 | Average SS  |
|                | South-Metro             | South-Metro | North-Metro             | North-Metro |
| August 2023    | 16                      | 9           | 314                     | 29          |
| September 2023 | 1,930                   | 105         | 429                     | 29          |
| October 2023   | 945                     | 67          | 386                     | 27          |
| November 2023  | 1,188                   | 65          | 677                     | 49          |
| December 2023  | 1,947                   | 233         | 146                     | 27          |
| January 2024   | 4,628                   | 986         | 251                     | 31          |
| February 2024  | 828                     | 84          | 164                     | 19          |
| March 2024     | 3,145                   | 202         | 90                      | 12          |
| April 2024     | 2,441                   | 273         | 69                      | 9           |
| May 2024       | 1,488                   | 152         | 326                     | 25          |
| June 2024      | 1,022                   | 70          | 159                     | 15          |
| July 2024      | 2,401                   | 183         | 1,242                   | 89          |
| August 2024    | 1,911                   | 107         | 1,398                   | 89          |
| Average        | 2-year                  | 97          | 2-year                  | 154         |

North Metro

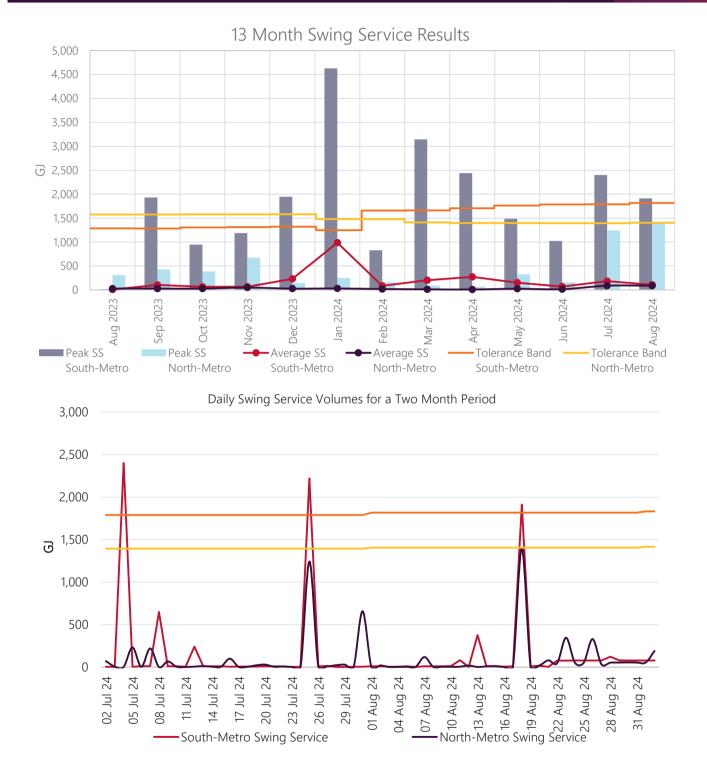

Swing service volumes in the North Metro sub-network were at relatively low levels for the month of August 2024 with the exception of spike on gas day 18 August. For gas day 18 August, the swing service was due to APA's pipeline injection higher than the total user's pipeline nomination amount (UPNA). ATCO advised AEMO that APA had a system failure and did not send pipeline injection data for gas day 18 August to ATCO before 10.30am (WST). Hence the initial pipeline injection data provided by ATCO to AEMO which was used for the swing service calculation for North and South Metro sub-networks was estimated. ATCO provided revised pipeline injection data to AEMO after the swing service calculation.

South Metro Swing service volumes in the South Metro sub-network were at relatively low levels for the month of August 2024 with the exception of spike on gas day 18 August. For gas day 18 August, the swing service was due to APA's pipeline injection higher than the total UPNA. ATCO advised AEMO that APA had a system failure and did not send pipeline injection data for gas day 18 August to ATCO before 10.30am (WST). Hence the initial pipeline injection data provided by ATCO to AEMO which was used for the swing service calculation for North and South Metro sub-networks was estimated. ATCO provided revised pipeline injection data to AEMO after the swing service calculation.

WA Monthly Swing Service Market Outcomes

August-2024

Terms:

- Peak SS means the maximum amount of Swing Service recorded on a day during that month.
- Average SS means the average amount of Swing Service for any day in that month.
- Peak Trend is the linear trend of the Peak SS data, using the least squares method.
- Average Trend is the linear trend of the Average SS data, using the least squares method.
- Tolerance Band is a marker AEMO will investigate and report on any Swing Service spikes that are larger than the Tolerance Band. The Tolerance Band is defined as a volume equal to the mean amount of Swing Service over the last 2 years plus 3 standard deviations.
