

The following table provides the information on the operation of the Swing Service market on the North Metro and South Metro sub-networks over a 13 month rolling window.

Month	Metro-South Sub-Network		Metro-North Sub-Network	
	Peak SS South-Metro	Average SS South-Metro	Peak SS North-Metro	Average SS North-Metro
May 2023	1,396	174	3,319	131
June 2023	1,908	159	93	6
July 2023	5,220	183	3,507	130
August 2023	16	9	314	29
September 2023	1,930	105	429	29
October 2023	945	67	386	27
November 2023	1,188	65	677	49
December 2023	1,947	233	146	27
January 2024	4,628	986	251	31
February 2024	828	84	164	19
March 2024	3,145	202	90	12
April 2024	2,441	273	69	9
May 2024	1,488	152	326	25
<b>Average</b>	<b>2-year</b>	<b>96</b>	<b>2-year</b>	<b>143</b>

### North Metro

Average and peak swing service volumes in the North Metro sub-network were at relatively low levels for the month of May 2024.

### South Metro

Swing service volumes in the South Metro sub-network were at relatively low levels for the month of May 2024 with the exception of spikes on gas days 8, 15 and 20 May.

- For gas day 8 May, the swing service was contributed by Agora Retail due to its swing repayment quantity (SRQ) and user's allocation instruction (UAI) did not match its user's pipeline nomination amount (UPNA). An apparent breach notice was issued on 22 May.
- For gas days 15 and 20 May, the swing service was contributed by APA due to pipeline injection was lower than total UPNA. APA advised AEMO there were shortfalls at the South Metro sub-network on the Parmelia Gas Pipeline due to pipeline pressure through the day caused by the ATCO pipeline that restricted APA in getting the gas through as per the nomination.

13 Month Swing Service Results

Daily Swing Service Volumes for a Two Month Period

Terms:

- Peak SS means the maximum amount of Swing Service recorded on a day during that month.
- Average SS means the average amount of Swing Service for any day in that month.
- Peak Trend is the linear trend of the Peak SS data, using the least squares method.
- Average Trend is the linear trend of the Average SS data, using the least squares method.
- Tolerance Band is a marker – AEMO will investigate and report on any Swing Service spikes that are larger than the Tolerance Band. The Tolerance Band is defined as a volume equal to the mean amount of Swing Service over the last 2 years plus 3 standard deviations.
