

Important Notice relating to Engineering Roadmap to 100% Consultancy Reports

AEMO has commissioned consultants to prepare reports to support its delivery of certain actions initiated by the Engineering Roadmap to 100% Renewables. This notice must be read with each report published here and listed in the Appendix.

Disclaimer

AEMO has commissioned the Reports (each document listed in the first column in Appendix A) to support its delivery of certain actions initiated by the Engineering Roadmap to 100% Renewables. The purpose of each Report is described in the third column in the Appendix.

AEMO has made reasonable efforts to ensure the quality of the information in these Reports but it is not the author of the Reports and cannot guarantee that the information, forecasts and assumptions contained in the Reports are accurate, complete or appropriate for your circumstances. The Reports do not include all of the information that an investor, participant or potential participant in the national electricity market might require, and does not amount to a recommendation of any investment.

The Reports do not constitute legal, business, engineering or technical advice. The Reports should not be relied on as a substitute for obtaining detailed advice about the National Electricity Law, the National Electricity Rules, any other applicable laws, procedures or policies or the capability or performance of relevant equipment. Anyone proposing to use the information in the Reports should independently verify its accuracy, completeness and suitability for purpose, and obtain independent and specific advice from appropriate experts.

Accordingly, to the maximum extent permitted by law, AEMO and its officers and employees:

- make no representation or warranty, express or implied, as to the currency, accuracy, reliability or completeness of the information in the Reports; and
- are not liable (whether by reason of negligence or otherwise) for any statements, opinions, information or other matters contained in or derived from this, or any omissions from it, or in respect of a person's use of the information in the Reports.

Acknowledgement

AEMO acknowledges the work of the Consultants (listed in the second column in the Appendix) in preparing the Reports.

Appendix

Name of Report	Consultant	Purpose of Report
EV Technical Standards for Grid Operation	EnX	This report has been prepared by EnX for AEMO to fulfill the requirement for AEMO to consult with industry on disturbance withstand, grid support and grid connection requirements for EV and EVSE with the view to informing EV integration efforts, as described in requirement A37, FY2024 Priority Actions, in the Roadmap.
The Role and Need for Inertia in a NEM-Like System	Vysus Group	This report has been prepared by Vysus group for AEMO and contributes toward AEMO's commitment to perform targeted future system dynamic studies, identifying emerging phenomena, and interactions between phenomena, as described in the Engineering Roadmap FY2024 Priority Actions report.
