1 Introduction

1.1 Overview

These are the release notes for the upcoming deployment to implement changes to the [AEMO WEM Market Data site](#), notably additions to Operational Demand and Withdrawal, and Facility SCADA data.

The changes introduced in this release are described in the sections below.

2 Real-Time Market Data

This release enhances the WEM Market Data site with the addition of three new pages. These changes add to the June 2026 Market Data site release to improve accessibility and transparency by publishing key WEM Real-Time Market data in CSV format, as a supplement to the existing JSON-format publications. The following list summarises the new and updated data sets. Note that due to size restrictions, the CSVs are partitioned by year except where otherwise noted.

- Operational Demand & Withdrawal: This page provides Operational Demand, Unscheduled Operational Demand, and Operational Withdrawal data, aggregated from 5-minute averaged SCADA in MW.
- Facility SCADA data
 - Facility SCADA-EOI: This page provides the end-of-interval SCADA readings for each Facility.
 - Facility SCADA: This page provides the average output for each Facility in MWh across each Dispatch Interval.

Historical data will be available from 08:00 AWST 1st October 2023. The latest CSV will be updated daily with the latest available day, at 08:30 AWST.
