1 Introduction

1.1 Overview

These are the release notes for WEM Dispatch Engine 3.2.3 release. This WEMDE release includes the introduction of retry functionality for any failed Dispatch Intervals.

The changes introduced in this release are described in the sections below.

1.2 Terms and abbreviations

The terms and abbreviations used in this document are outlined in Table 1.

Table 1 Terms and abbreviations

Abbreviation	Expanded name
WEMDE	WEM Dispatch Engine

2 WEMDE Retry Functionality

Where WEMDE fails to complete a solve for any interval in a Market Schedule (Dispatch, Pre-Dispatch or Week-Ahead), the retry mechanism will ensure WEMDE does not immediately cancel the solve. Instead, it will now immediately restart the solve from the failed interval, for the earlier of:

- A certain number of times until successful, or
- The timeout for the Market Schedule is reached (tied to the Schedule interval length).

3 Additional Scope

In addition to the functionality above, the scope mentioned below has been delivered in this release.

Table 2 Additional Scope Items

Scope Item	Status	Summary
WEMDE-UI	●	Update user interface to display retried interval results

Table 3 Status Legend

Status
● Internal AEMO changes. No impact to Market Participants.
● Additional functionality. Market Participants awareness only.
● Change to Market Participant functionality. Needs Market Participant attention.
