Title: Strategic Corporate Plan 2025

Feedback:

Do you know that your 2025 key measures, numbered one, three and seven each contain a double negative in their aim and target which means it's a positive and very concerning for the Australian public, if read.

You need to check the wording of these three key measures and remove the 'No' at the start of them or make the target 100%. This is basic stuff.

I cannot believe your company has worded the key targets in such a convoluted way! Shame on you, given the disgraceful energy crisis Australians are facing, with which AEMO is complicit.
