

Declared Wholesale Gas Market (Victoria)

Notice of AEMO's decision to submit Rule Proposal to AEMC

This Notice advises all Registered Participants and other interested stakeholders that consultation on Energy Australia's proposed rule change to the National Gas Rules on the application of constraints in the Declared Transmission System (Rule Proposal), concluded on 24 October 2016.

AEMO received two submissions on the Rule Proposal. The proponent, Energy Australia, has consented to AEMO making a request to the AEMC for a rule in accordance with the proposal on the basis that section 305 of the National Gas Law (fast track process) need not apply. Accordingly AEMO has decided not to consult further on the Rule Proposal, and to submit it to the Australian Energy Market Commission (AEMC) within 20 business days. AEMO has made this decision under rule 358(3) of the National Gas Rules, being satisfied that the Rule Proposal meets the criteria in rule 356(2)(b).

The two submissions on the Rule Proposal are published alongside this notice on AEMO's website.

Notice Date: 4 November 2016
