

FINAL DETERMINATION

This notice advises all Participants and other interested stakeholders of AEMO's final determination in accordance with Section 7.6.1 of the Capacity Certificates Auction and Transfer Procedures to make or amend a determination of the allocation of system injection points or system withdrawal points (as the case may be) in the declared transmission system to capacity certificate zones.

New document:

- Capacity Certificates Zone Register

In 2020, the AEMC made the following rule changes in respect of the DWGM:

1. DWGM simpler wholesale price¹; and
2. DWGM improvement to AMDQ regime².

Under NGR 327B(1) of the DWGM improvement to AMDQ regime rule change, AEMO must determine and may amend the allocation of system injection points or system withdrawal points (as the case may be) in the declared transmission system to capacity certificates zones. Before making or amending a determination under subrule (1), AEMO must consult in accordance with the capacity certificates auction procedures.

Consultation on the new capacity certificates zone register concluded on 11 February 2022. AEMO received one submission in response to the impact and implementation report (IIR). The submission and AEMO's response are outlined in Attachment A. The capacity certificates zone register will be implemented as published in the IIR.

Date: 08 March 2022
