## 1. INTRODUCTION

~~1.~~ *Drafting Note: Only substantive changes to the introduction section have been change-marked. Formatting and template style changes not marked.*

### 1.1. Purpose and scope

The NEM Settlement Revisions Policy (Policy) is made under clause 3.15.19(e) of the National Electricity Rules (NER) for the purpose of issuing revised statements under clause 3.15.19 of the NER.

~~This Policy commences on and from 15 March 2013 and supersedes AEMO's Settlement Estimates and Revisions Policy for the purpose of issuing revised statements under clause 3.15.19 of the RulesNER.~~

The Policy has effect only for the purposes set out in the NER. The National Electricity Law and the NER prevail over the Policy to the extent of any inconsistency.

~~This Policy may only be amended in accordance with clause 8.9 of the NER.~~

### 1.3.1.2. Definitions and interpretation

#### 1.3.1.2.1. Glossary

Terms defined in the National Electricity Law and the NER have the same meanings in the Policy unless otherwise specified in this clause.

Terms defined in the NER are intended to be identified in the Policy by italicising them, but failure to italicise a defined term does not affect its meaning.

The words, phrases and abbreviations in the table below have the meanings set out opposite them when used in the Policy.

Term	Definition
<del>AS</del>	<i>Ancillary Service</i>
EMMS	Electricity Market Management System
MSATS	Market Settlement and Transfer Solution
<del>NMI</del>	<i>National Metering Identifier</i>
<u>Settlement Day</u>	<u>Calendar day from 12:00am to 11:59pm</u>
<u>UFE</u>	<u>Unaccounted for energy</u>

#### 1.3.2.1.2.2. Interpretation

This Policy is subject to the principles of interpretation set out in Schedule 2 of the National Electricity Law. All references to time are to Australian Eastern Standard time.

## 2. NER REQUIREMENTS

- (a) Clause 3.15.19(e) of the NER requires AEMO to develop this Policy for *routine revised statements* and *special revised statements*, to include:
- (i) a calendar setting out when *routine revised statements* will be issued by AEMO;
  - (ii) the process by which the calendar can be amended by AEMO and the process by which *Market Participants* are notified of any amendment; and
  - (iii) a transitional process by which AEMO will issue any outstanding *routine revised statement*.
- (b) *Routine revised statements* and *special revised statements* are to be issued in accordance with this Policy (NER 3.15.19(c)(2)).
- (c) Under NER 3.15.19(b), *routine revised statements* must be issued to each *Market Participant* approximately 20 weeks and approximately 30 weeks after each *billing period*. These statements must recalculate *settlement amounts* using:
- (i) the latest available input data (including amended *metering data*, *trading amounts*, and *Participant fees*); and
  - (ii) the most recent version of AEMO's settlement calculation software applicable to the *billing period*.
- (d) Under NER 3.15.19(a)(3), AEMO must issue *special revised statements* to *Market Participants* for a *billing period* in respect of which a *settlement amount* is to be adjusted as a result of:
- (i) changes in the applicable amount of GST under clause 3.15.10A; or
  - (ii) the outcome of a dispute about a *final statement*, where the adjusted *settlement amount* is less than 95% or more than 105% of the *settlement amount* in the relevant *final statement*.

Note: This Policy also allows for the issue of *special revised statements* where the adjustment amount exceeds the thresholds in sub-paragraph (ii) without a formal dispute, if AEMO and all affected *Market Participants* agree.

- (e) Disputes about a *final statement* or its supporting data must be raised within 6 months of the relevant billing period (NER 3.15.19(b)), or within 20 *business days* of the date of the *final statement* if the dispute relates to an adjustment amount and interest incorporated into that statement (NER 3.15.20(c)).

### **13.3. REVISED STATEMENT POLICY**

#### **3.1. Transitional arrangements**

##### **3.1.1. Five minute settlement transition**

From 12:00am 1 July 2021 (the commencement date), the *trading interval* for settlement in the *NEM* will change from 30 minutes to 5 minutes<sup>1</sup>. Therefore:

- (a) all settlement runs (preliminary, final and revised) for settlement days up to and including 30 June 2021 will calculate *trading amounts* using the *30-minute price* for each *30-minute period*;
- (b) all settlement runs for settlement days from and including the commencement date will calculate *trading amounts* using the *spot price* for each *5 minute trading interval* in accordance with the *NER* as in force after the commencement date;
- (c) each *settlement statement* for the *billing period* which includes the commencement date will aggregate the settlement calculations for the settlement days up to and including 30 June 2021 and the settlement days from and including the commencement date.

To avoid doubt, the change in the duration of *trading intervals* from 30 minutes to 5 minutes on the commencement date is not of itself a reason to adjust any *settlement amount*.

##### **13.1.1.3.1.2. Global settlement transition**

Under the 'global settlement' framework, all retailers will bear the cost of unaccounted for energy (UFE). From 12:00am 6 July 2022 (the commencement date), the *NEM* will move from 'settlements by difference' (where the *Local Retailer* is responsible for the settlement of the net energy flow at *transmission network connection points* for its *local area* after deducting the *energy metered* for all *market loads*) to 'global settlement' (where all loads are fully reconciled and settled, with UFE allocated among all *Market Customers*)<sup>2</sup>. Therefore:

- (a) all settlement runs (preliminary, final and revised) for settlement days up to and including 5 July 2022 will calculate *trading amounts* using the 'settlements by difference' methodology;
- (b) all settlement runs for settlement days from and including the commencement date will calculate *trading amounts* using the 'global settlement' methodology;
- (c) each *settlement statement* for the *billing period* which includes the commencement date will aggregate the settlement calculations for the settlement days up to and including 5 July 2022 and the settlement days from and including the commencement date; and
- (d) any changes in the *metered energy* amounts for settlement days from 6 July 2022 will change the UFE allocations.

<sup>1</sup> Link to the AEMC rule change information: <https://www.aemc.gov.au/rule-changes/five-minute-settlement>

<sup>2</sup> Link to the AEMC rule change information: <https://www.aemc.gov.au/rule-changes/global-settlement-and-market-reconciliation>

To avoid doubt, the change in the settlement methodology from 'settlements by difference' to 'global settlement' on the commencement date is not of itself a reason to adjust any settlement amount.

Note that AEMO will be publishing UFE data from 1 July 2021. However, participants will not be billed for the UFE component until 6 February 2022. UFE is allocated on a pro-rated basis to Market Customers. Any changes in the 'accounted-for' energy will change the allocation of UFE.

### **13.4.3.2. Need for revised statements**

*Preliminary statements* are issued 5 business days after the end of each 7-day billing period or trading week. AEMO and *Market Participants* are able to check and reconcile the settlement results from the *preliminary statements*, which form the basis for the *final statements*, produced 18 business days after the end of the *billing period*. However, there are several situations where it may be found, after the issue of *final statements*, that the data in those *final statements* did not accurately reflect the value of trading activity conducted under the *Rules-NER*.

Examples of these situations are:

- Systematic errors in the determination of energy values being discovered after routine or special inspections of metering installations.
- As some manually read meters are read on a 3-month cycle, metering data may be revised when data from metering installations without communications facilities becomes available.
- Systematic error in the configuration of *National Metering Identifiers* (NMI) in the Market Settlement and Transfer Solution (MSATS) being discovered after transfer or audit.
- Error in the standing data details in the settlements processing system and systematic errors in the processing software.

While energy adjustments primarily may only affect a small group of only two Market Participants, there is a second-order effect on a wider group (if not all) from the flow-on effects of *ancillary services* recovery being largely determined pro-rata with respect to *Market Customer* and/or *Market Generator* energy of Market Participants. Adjustments to *ancillary service (AS)* payments have a direct effect on these recovery amounts.

When situations such as these come to light and alternative settlement results which are more consistent with the source data, *Rules-NER* and *ancillary service AS* contracts become apparent, there is a need to make appropriate adjustments to the relevant *settlement statements*.

### **13.5. Principles**

~~The following points are the main principles of the revision procedure. The source Rules are also shown for reference. These principles are discussed in more detail in Section 5.3 of this Policy.~~

- ~~• Inconsistencies in settlement results may be raised for investigation no more than 6 months after the billing period concerned. (Rules clause 3.15.18(b))~~
- ~~• AEMO and the notifying Participant will use reasonable endeavours to resolve inconsistencies in the preliminary statements and associated supporting data within 15 business days of the end of the billing period. (Rules clause 3.15.18(a))~~

- Only one preliminary statement will be issued for each billing period. (Rules clause 3.15.14)
- Settlement amounts shown on final statements will not be revised in the period between the issue of the final statement and the completion of associated financial payments (Rules clause 3.15.16)
- Routine revised statements will be issued approximately 20 weeks and approximately 30 weeks after each billing period using the latest input data and settlement processing calculation software routines that are available. (Rules clause 3.15.19(b))
- Special revised statements will be issued where the inconsistency in results would lead to an adjustment exceeding 5% of the value shown on the last issued final or revised settlement statement of any Market Participant (Rules clause 3.15.19(a))
- Any financial adjustment arising from a revised statement is entered as a line item in the next final statement issued at least 8 business days after that revised statement (Rules clause 3.15.19(d))
- Inconsistencies in the adjustment amounts for prior periods as shown in final statements must be raised within 20 business days of that final statement (Rules clause 3.15.20(c))

### **13.7.3.3. Details of revision processes**

This section outlines the stages at which revisions to *settlement statements* can occur, and describes the statements AEMO can issue at each stage. Section 3.4 outlines how and when *Market Participants* can raise settlement issues with AEMO, linking to the revision process.

#### **13.7.1. Six-month window**

Notification of concerns regarding settlement results need to be documented in writing (letter, fax or preferably e-mail) to AEMO to provide the basis for determining the earliest *billing period* that ultimately may be revised. Telephone enquiries will be accepted and acted upon, but will not be used in determining how far back revisions may be undertaken. The whole of the *billing period* that contains the date which is 6 calendar months prior to the date of the notification will be revised if affected by the outcome of the investigation. The whole of the *billing period* immediately prior to that will be ineligible under Rules clause 3.15.18(b).

When a *Market Participant* notifies AEMO, AEMO will endeavour to resolve the issue by documented agreement with that *Market Participant* and any other *Market Participant* who raises the same issue in a similar timeframe. These parties are referred to as the 'primary Participants' in this document. The resolution mechanism will be applied generally to the Market, causing changes to settlement results for a wider group of *Market Participants* (referred to as the 'affected Participants'). The affected Participants will be notified of the issue by means of a settlement communication e-mail if AEMO considers the variance to be significant, or if one or more of the affected Participants inquire about the variance

#### **13.7.2. Agreement with participants**

If a *Market Participant* notifies a matter to AEMO, that *Market Participant* will almost certainly have a financial interest in having the matter resolved in accordance with the Rules and/or AS contracts.

~~While resolution will generally advantage the *Market Participant*, there have been cases where resolution has been to the *Market Participant's* financial disadvantage. This *Market Participant* is the primary *Participant* with whom AEMO will negotiate to resolve the issue. AEMO may discuss the issue with other affected *Participants* ('secondary *Participants*') to ensure that the resolution covers all the related circumstances that may apply to affected *Participants*.~~

~~AEMO will seek to negotiate agreement with the primary *Participant* about the resolution of the issue. When a view is formed of the principles of resolution, that view will be communicated to the secondary *Participants* for their agreement. If the secondary *Participants* agree also, then AEMO will arrange for appropriate revision of results, as set out in the following sections.~~

~~If agreement cannot be reached, and additional information or argument can be provided to support an alternative view, then AEMO will attempt to renegotiate an agreement with the primary *Participant* using that new information or argument.~~

~~The aim is to obtain agreement for resolution of the matter from all primary *Participants*. If this cannot be realised within a reasonable time, or further progress appears unlikely, then AEMO or the disagreeing *participant* may elevate the matter by lodging it with the Dispute Resolution Adviser.~~

#### **13.7.3.3.1. Revision of preliminary results**

The fundamental purpose of *preliminary statements* is to provide a draft, which can be analysed and reconciled to identify anomalies and inconsistencies before the *final statement* is prepared. If these problems can be discovered with sufficient time to prepare the necessary changes to the input data or processing, then settlement results on the *final statements* will be satisfactory. This reduces the values of adjustments that would become necessary from later revisions, interest payments, GST adjustments and the time involved in reconciliation and audit of *revised statements*.

If the rectification leads to changes in the *final statements*, which AEMO considers to be significant, then a settlement communication ~~e-mail~~ will be issued to provide explanation of the variances. Similarly, a communication ~~e-mail~~ will be issued if one or more *Market Participants* inquire about such variances after final statement issue.

As with all AEMO communications, the confidentiality of *Market Participant* information will be a primary consideration. The extent of the detail released in a settlement communication ~~e-mail~~ will protect that confidentiality and will generally be limited to identification of the variances, as all the supporting data will be provided with the relevant *final statements*.

However, it may not be possible to confirm and make the necessary changes within the target time of 15 *business days*. The *preliminary statement* is posted 5 *business days* after the billing period and for any software anomalies the software change control procedure may take more than 10 *business days* to complete.

#### **13.7.4.3.3.2. Revision of final statement results for payment**

The notice period to *Market Participants* for the payment amount to be transacted each week is set at two *business days* to maximise the time available for checking preliminary results. If an inconsistency is discovered in a *final statement* before payment day, no action can be taken to revise the *settlement amounts* payable under Rules-NER clause 3.15.16. The reason is that all AEMO settlement transactions essentially balance to zero, and any change to the results of one

*Market Participant* will necessarily affect at least one other *Market Participant* and will generally affect many. At two days out from payment, the need for certainty in the amount is paramount. Any discrepancies in the *final statements* will be adjusted in subsequent *routine revised statements*.

### **13.7.5.3.3. Routine revised statements**

*Routine revised statements* are issued approximately 20 weeks and 30 weeks after each billing period. Adjustments arising from these revised statements are generally relatively small. They arise typically from minor revisions of metering data and *ancillary service* payments, and consequent revisions to other market transactions such as recoveries and GST.

Routine revised statements will always be generated from the central settlement software, accompanied by full supporting data published through the Electricity Market Management System (EMMS).

If there is a change required which AEMO considers to be above the background 'noise' of the minor revisions, then AEMO will provide reasons by way of a settlement communication e-mail to the *Market Participant* settlement contacts. A settlement communication e-mail will also be issued where two or more *Market Participant* inquiries, relating to the same changes in a routine revised statement, are received.

### **13.7.6.3.3.4. Special revised statements**

Under NER clause 3.15.19, AEMO must issue a *special revised statement* where an adjustment is required:

- following resolution of a formal dispute, either after the issue of the 30-week *routine revised statement* for a relevant *billing week*, or where the adjustment amount arising from a pending *revised statement* exceeds 5% of the value of the *settlement amount* of any affected *Market Participant*; or
- in respect of GST under NER clause 3.15.10A.

AEMO may also issue a *special revised statement* for an adjustment to reflect an issue identified and resolved outside of a formal dispute process, if:

- the adjustment amount exceeds 5% of the value of the *settlement amount* of any affected *Market Participant*; and
- except in the case of an interim *special revised statement* (described below), both *routine revised statements* for that *billing period* have already been issued, AEMO will issue a *special revised statement* all affected *Market Participants* have agreed to AEMO issuing the *statement*. This will take place as soon as practicable after investigations have been completed and resolved to the satisfaction of AEMO and the primary *Participants* involved.

There are three options for the issue of *special revised statements*:

- (a) System ~~s~~Special ~~r~~Revised ~~s~~Statement

The settlement software may be used to generate a *revised statement*, which is issued through the EMMS. Revised supporting data would be available through the EMMS. A

settlement communication e-mail would be issued to notify settlement contacts of the *special revised statement's existence* and set out the reasons for its issue and details of the adjustment.

(b) Manual ~~s~~Special ~~r~~Revised ~~s~~Statement

A 'manual' statement calculated on spreadsheets and showing the adjustment amount only, may be issued to each of the affected *Market Participants*. The reasons for the *revised statement* would be attached to the statement. Supporting data for the calculation of the adjustment would be available on spreadsheet extract, but not be provided unless requested by the *Market Participant*. This minimises the risk of manual handling leading to inadvertent disclosure of ~~ly breaching confidentiality through incorrect cutting, pasting and posting of~~ *Market Participant confidential* data manually. A manual *special revised statement* may cover multiple *billing periods*, and will generally be issue-based rather than *billing period* based.

(c) Interim ~~s~~Special ~~r~~Revised ~~s~~Statement

In cases where ~~the last a~~ *routine revised statement* for the *billing period* concerned is yet to be issued, an interim *special revised statement* may be issued manually to a restricted set of the affected *Market Participants* with approximate adjustment amounts. The manual statement layout and supporting data would be as for option (b)~~(ii)~~ above.

This option is especially suited to the situation where a significant energy adjustment is needed between two *Market Participants*. It would allow the settlement position of those two to be approximately corrected as soon as practicable, without burdening any other affected *Market Participants* with a special statement for a relatively trivial amount. When the *routine revised statement* came up for preparation, all *Market Participants* would be adjusted accurately with respect to other transactions such as recoveries, fees etc. The value of the manual statement would be reversed out by a manual entry in the *routine revised statements* for the primary *Market Participants*.

Like the manual *special revised statement*, an interim *special revised statement* may cover multiple *billing periods*, and will generally be issue-based rather than *billing period* based. If multiple *billing periods* are involved, then the reversal would be inserted at approximately the middle *billing periodweek* of the sequence, rather than splitting it pro-rata over each of those weeks.

### **13.7.7.3.3.5. Adjustments**

An adjustment arising from a *revised statement* is entered in the first *final statement* that is posted at least 8 *business days* after the date of issue of that *revised statement*. Interest is calculated from the rates set for each day between the original payment date for the *billing period* and the date of payment of the adjustment. Any differences in GST amounts are also brought to account, and a GST adjustment note created on the EMMS Participant files server.

Since the adjustments arising from revised statements appear as line items in *final statements*, those adjustments cannot be changed prior to transacting the *final statement* payment amount ~~as per 5.3.3 above~~. There is only one payment amount, which includes any adjustments from *revised statements*, to be transacted each week for each *Market Participant*.

### **13.8.0. Revisions to adjustment amounts**

~~It is possible that a last-minute transcription error or processing anomaly may occur in the preparation of an adjustment amount to appear in a *final statement*. In the case of the 30-week *revised statement*, the 6-month window would have already closed. Clause 3.15.20(c) of the Rules allows a time-limited window of 20 *business days* to raise such inconsistencies for investigation. Resolution would be by means of a subsequent *special revised statement*. This provision is not an opportunity to resurrect any fundamental issues that were resolved in principle before the issuing of the *revised statement*.~~

## **3.4. Notification and resolution of issues and disputes**

### **3.4.1. Six-month window**

AEMO can only revise settlements after the 30-week *routine revised statement* for a *billing period* if a formal dispute was initiated:

- within 6 calendar months of the last day of the *billing period* (NER clause 3.15.18(b)); or
- if the dispute relates only to the calculation of an adjustment amount or interest shown on a *revised statement*, within 20 *business days* of the *final statement* that incorporates that amount (NER clause 3.15.20(c)).

*Market Participants* should be aware of these time limits, which cannot be extended. They apply even if an issue has been previously raised with AEMO but not resolved by the 30-week statement.

### **3.4.2. Raising an issue**

Subject to these NER requirements and limits, any *Market Participant* who believes there is an error in a settlement statement can notify AEMO's settlements team of the issue informally at an earlier stage (preferably by e-mail).

### **3.4.3. Agreement with participants**

If one or more *Market Participants* (referred to in this document as the 'primary Participants') notify a matter to AEMO, either informally or under stage 1 of the NEM dispute resolution process, AEMO will investigate the issue and seek to resolve it with the primary Participants.

As any necessary adjustment will be applied generally to the Market, it may impact settlement results for all or a wider group of *Market Participants* (referred to as 'secondary Participants'). AEMO may discuss the issue with secondary Participants to ensure any proposed resolution covers all circumstances that may be relevant to affected Participants.

### **3.4.4. Effecting an agreed outcome**

Settlement adjustments resulting from the resolution of an issue raised by a primary Participant will be reflected in the next *routine revised statement*, unless AEMO is required or permitted to include the adjustment in a *special revised statement* (see section 3.3.4).

## **13.10.3.5. Settlement calendars**

Typically, there are four *settlement statements* issued each week:

- a preliminary, usually on Friday;
- a final, usually on Wednesday;
- a 20-week revised, usually on Tuesday; and
- a 30-week revised, usually on Thursday.

NEM public holidays will change the above timing, and may lead to two statements occasionally being issued on the same day. It is important that all *Market Participants* are aware of the statement and payment dates.

AEMO has published on its website settlement calendars which set out the dates of issue of *preliminary, final and revised statements* as well as the dates for payment transactions. For the purposes of [NER 3.15.19\(e\)\(1\)](#), the published settlement calendars are incorporated into this Policy.

AEMO may also elect to publish other calendar formats that may assist *Market Participants* in conducting their settlement processes. For the avoidance of doubt, AEMO publishes ~~the~~ 'NEM List Calendars' in order to fulfil its obligation under the NER clause 3.15.19(e)(1). Where a discrepancy exists between the 'List-NEM Calendar' and another calendar, the 'List-NEM Calendar' is to prevail.

The settlement calendars are published approximately a year in advance, based upon the public holiday information available. Proclamation of public holidays is the responsibility of the individual State Governments, and the notice provided in advance of the actual holidays can vary significantly. In particular, there is often uncertainty as to whether a day in lieu will be proclaimed when the public holiday naturally falls on a Saturday. Late proclamations lead to late amendment of the calendars.

### **13.13.3.6. Process for calendar amendment**

The settlement calendars are amended by uploading new versions of each document on the AEMO website at the following location:

<http://www.aemo.com.au/Electricity/National-Electricity-Market-NEM/Settlements-and-payments/Prudentials-and-payments/Settlement-Calendars>

An AEMO ~~c~~ommunication ~~e-mail~~ is also issued ~~all Registered Participants~~ to Market Participants when the calendar has been amended, together with the reason for the amendment.

The settlement calendar covers the three years, centred on the current year. Towards the end of each calendar year, a major update is prepared whereby the previous calendar year is deleted and the year after the subsequent year is added. Amendments are uploaded to the AEMO website and advised to Participants as soon as any change, which affects the calendar dates, is confirmed.
