

CONSUMER DATA RIGHT (CDR) CONSULTATION

PROCEDURE CONSULTATION

FIRST STAGE PARTICIPANT RESPONSE TEMPLATE

Participant: Intellihub

Submission Date: 27/05/2022

Table of Contents

1. Context	3
2. Questions on proposed CDR changes	3
3. Feedback on proposed minor amendments	4

1. Context

This template is to assist stakeholders in giving feedback about the changes detailed in the initial draft procedures associated with the Consumer Data Right consultation.

The changes being proposed are because of NER rule changes which have occurred requiring changes to AEMO’s Retail Electricity Market Procedures and the following proposed changes by proponents and AEMO to implement recommended process improvements.

2. Questions on proposed CDR changes

Heading	Participant Comments
Does your organisation support the proposal contained in the Issues Paper? If not, please specify the areas where your organisation does not support AEMO’s assessment and specify information as to your rationale	Intellihub is supportive of the proposal considering the proposed changes will have minor impact on systems and existing processes.
Are there better options to accommodate the change proposals that better achieve the required objectives? What are the pros and cons of these options? How would they be implemented?	No further comments.
What are the main challenges in adopting these proposed changes? How should these challenges be addressed?	Intellihub is not anticipating any challenges in adopting these proposed changes.
Do you have any further questions or comments in relation to the proposals?	Intellihub is seeking for some rough indication of volume increase in the CR5054 and CR5055 as a result of the adoption of these proposed changes as well as any other market transactions that might experience unintentional impacts e.g. PMD or VMD.

3. Feedback on proposed minor amendments

Document	Participant Comments
<p>1. For the enumerations lists in the procedures document, values such as 'Sample Tested' and 'Three-Phase Three-Limb', to be changed from mixed case to uppercase, to improve implementation and validation for both AEMO and Industry.</p>	<p>Intellihub is supportive of the proposal.</p>
<p>2. For the Voltage Transformer Type enumerations, to remove descriptions where they exist in brackets e.g. 'CVT (Capacitive Voltage Transformer)</p>	<p>There is a typo error in "CONSUMER DATA RIGHT (CDR) MSATS CONSULTATION - Issue Paper, 27 April 2022" the suggested value for Inductive Voltage Transformer is "ITV" but should be "IVT". Otherwise, Intellihub is supportive of the proposal.</p>
<p>3. Where Ratio enumerations exist, remove spaces between characters e.g. '3300 : 110' to '3300:110'</p>	<p>Intellihub is supportive of the proposal.</p>
<p>4. INFORMATION' and 'STATISICAL' are to be truncated to 'STATIS' and 'INFORM' to fit within the 'USE' field 10 character max limit.</p>	<p>Intellihub is supportive of the proposal.</p>
<p>5. Alignment of character requirements across aseXML and the Standing Data for MSATs MSATS document by including a reference to the Australian Standards requirements, where relevant in the document applicable.</p>	<p>Intellihub is supportive of the proposal.</p>
<p>6. For the correction of the GPSCoordinates format, implemented inas part of the r42 schema, to be reflected in the Standing Data for MSATs document: CATS_Meter_Register- Browser Cross Reference table.</p>	<p>Intellihub is supportive of the proposal.</p>
<p>7. For the truncated CurrentTransformerRatioAvailable and CurrentTransformerRatioConnected element names to be reflected in Table 4 CATS_Meter_Register – Browser Cross Reference.</p>	<p>Intellihub is supportive of the proposal.</p>

Document	Participant Comments
8. For the VoltageTransformerTest aseXML path to be corrected to ElectricityMeter/VoltageTransformerTest in table 4 CATS_Meter_Register – Browser Cross Reference.	Intellihub is supportive of the proposal.
9. For GPS Coordinates of 0.00000 (5-7 decimal places), to align with the format specified in the NMI Standing Data Procedure, to be applied where no GPS coverage is available at the metering installation.	Intellihub is supportive of the proposal.
10. For the inclusion of missing Transformer Valid Values to be added to the Standing Data for MSATS document and for all values to be formatted from smallest to largest.	Intellihub is supportive of the proposal.
11. The CATS Procedures to be updated to ensure that ‘Meter Manufacturer’ and ‘Meter Model’ are only required when the status code is ‘C’ (Current) for CR3050 and CR3051 transactions (CiP_061).	Intellihub is supportive of the proposal.
12. For the CATS Procedures to be updated to remove the CR6500/1 Change ROLR Completed Notification from the Change ROLR section to align with the WIGS Procedures	Intellihub is supportive of the proposal.
13. For the CATS Procedures to be updated for CRs (5001 & 5021) to include the NMI Classification of NCONUML as a classification code that have objections raised on it	Intellihub is supportive of the proposal.
14. Update the WIGS procedure for CR5021 to allow the ENLR (LR) to object.	Intellihub is supportive of the proposal.
15. Update the WIGS procedure to include BULK and XBOUNDARY to CR1500 to allow the MDP to send it to complete the CR.	Intellihub is supportive of the proposal.
