

10 August 2022

Notice to all Registered Victorian Declared Wholesale Gas Market Participants.

This Notice is to advise Participants on AEMO's decision to approve amendments to the Wholesale Market Electronic Communications Procedure's Technical Documents, that defined DWGM market systems, including the:

- DWGM Participant Buildpack; and
- User Guide to MIBB Reports.

Amendments to the Technical Documents can be made by AEMO under the Wholesale Market Electronic Communication Procedures section 2.5(b) in the event the Technical Document change is a result of a Rule or Wholesale Market Procedure change.

Market Participants were consulted, under the ordinary Procedure Change Consultative Process prescribed under Rule 135EE of the National Gas Rules (NGR) which concluded on 6 May 2021, on the "[Implementation of 2020 DWGM enhancement rule changes](#)" which resulted in the substantive changes to these Technical Documents.

Market Participants have been provided information sessions on the new functionality along with an opportunity to undertake PREPROD testing to review and use the new CC Auction and CC Transfer functionality and reports outlined in the Technical Document changes.

The effective date of the changes to the documents outlined below is to align to the first run of the Capacity Certificate auction scheduled for 24 August 2022, including the CC Auction processes and reporting leading into the date of the first auction.

The Capacity Certificates can be used for tie breaking purposes in the Victorian Declared Wholesale Gas Market from gas day 1 January 2023.

A further update to the Technical Documents will be undertaken by December 2022 to represent the removal of AMDQ and AMDQ Credit Certificates from market systems.

AEMO has approved the proposed amendments (Attachment A) of this Notice as required to implement the market systems changes.

The key changes are summarised below:

DWGM Participant Build Pack changes include:

- Updated to define the Markets Portal web interfaces new "DWGM" section for Capacity Certificate auctions and Capacity Certificate transfers.

MIBB User Guide changes include:

- - INT339 CC Auction Bid Stack
- - INT340 CC Auction Final Bid Confirmation
- - INT342 CC Auction System Capability
- - INT343 CC Auction Quantity
- - INT344 CC Auction Bid Rejection

- - INT345 CC Auction Zone
- - INT349 CC Participant Auction Results
- - INT348 CC Transfer Report
- - INT351 CC Registry Summary
- - INT352 CC Registry
- - INT353 CC Public Auction Results
- Numerous minor editorial amendments were also included in the update to better reflect the operation of published reports.

ATTACHMENT A – DOCUMENTATION CHANGES

Final versions of the DWGM Participant Build Pack and the User Guide to MIBB Reports showing tracked changes between the current and amended versions are attached separately to this document.
